TESTIMONIAL

Nepean building and Infrastructure is a family owned business that has been operating for over 60 years. There have been many changes in the fabricated handrail and grating industry. The most noticeable is being competitive on price and fastest on lead time.

For Nepean B&I to achieve these goals it is imperative we align ourselves with partners/suppliers that we can trust to deliver on time price competitive quality goods.

Angelo Engineering has constantly hit the mark on all three criteria for the past 25 years Nepean has been using them. Whether it is supplying components for our products or parts to keep our machines running, Angelo Engineering have delivered a quality and service that in my opinion far exceeds any other company we have dealt with in the past.

Angelo Engineering has over 30 years' experience with tooling and engineering parts that is why I can say with great confidence that Nepean B&I fully recommends and endorses any business to utilise the services of Angelo Engineering.

Kind regards,

Daramel Dejvongsa
Procurement Manager
Nepean Building & Infrastructure
