

TESTIMONIALS

I engaged Mark to supply, programme and commission a two axis CNC tool post for a large, (2.4 metre swing) custom designed and built lathe for a client in Abu Dhabi.

Throughout the project he was always fully committed and co operative contributing beyond his contractual obligations. He successfully commissioned the lathe in the copper casting and rolling mill in Abu Dhabi. This was done in a timely and professional manner despite it being summer with ambient temperatures in the mill around 45 degrees C

I can recommend him as a very capable engineer who does what he says he will do, and always conducts himself in a thoroughly professional manner.
